

SHRAWAN KARKI

Full Stack Web Developer | UI/UX-Focused Engineer

Budhiganga 3, Morang, Nepal | +977 9700511314 | pratyushkarki6@gmail.com

[Portfolio](#) | [GitHub](#) | [LinkedIn](#) |

PROFESSIONAL SUMMARY

Full Stack Web Developer with hands-on experience building production-grade React applications and end-to-end systems using Node.js, Supabase, and Firebase. Combines precise UI/UX execution — translating Figma designs into pixel-accurate, responsive components — with backend proficiency in database schema design, authentication, and secure API integration. Seeking an entry-level Full Stack role to contribute strong frontend craftsmanship and growing backend/data-handling expertise to a product engineering team.

TECHNICAL SKILLS

Frontend & Frameworks: Next.js, React.js, TypeScript, JavaScript (ES6+), Tailwind CSS, Framer Motion, HTML5, CSS3, Responsive UI/UX Design

Backend & Databases: Node.js, Express, Supabase (PostgreSQL, Row-Level Security), Firebase (Firestore, Auth), RESTful APIs

UI/UX Design & Craftsmanship: Figma, Balsamiq

Cloud Infrastructure & Tools: Cloudflare Workers, Vercel, Cloudflare Pages, Git, GitHub, Vite, VS Code

Security & Architecture: Input Sanitization, Modular Component Architecture, Database Schema Design

WORK EXPERIENCE

Frontend Developer — Rato Topi IT Team

Aug 2026 – Present

Itahari, Nepal

- Engineered responsive, production-ready UI components using React, Vite, and Tailwind CSS, ensuring consistent rendering across devices and browsers.
- Translated Figma design specifications into pixel-perfect, reusable components, reducing design-to-development handoff friction.
- Optimized rendering performance and cross-browser compatibility, improving page load consistency across the application.
- Collaborated within an agile team on frontend-backend integrations, aligning UI development with API contracts and data models.

Freelance Developer — Freelancer

Jun 2025 – Mar 2026

Remote

- Delivered high-quality web solutions to global clients, tailored to custom visual and functional specifications.
- Focused on responsive design, performance optimization, cross-browser compatibility, and clean architectural principles.
- Managed client communication, requirement gathering, and project deployment independently.

KEY PROJECTS

Garment Flow Management System | Full Stack Web Application

- Architected a full-stack production-tracking system with a relational database schema to manage order stages, inventory levels, and operational analytics in real time.
- Implemented secure authentication and role-based access controls, protecting sensitive inventory and production data.
- Engineered real-time state management for live inventory updates, enabling accurate tracking of stock levels across active workflow stages.

- Integrated backend APIs with a React frontend to synchronize workflow-stage transitions, cutting manual tracking overhead for production status.

Interactive Portfolio OS / shrawankarki.com.np

- Architected a React-based operating-system-style interface featuring dynamic window management, simulating a desktop-like multitasking experience in the browser.
- Built a custom interactive terminal component, extending the portfolio beyond static content into an explorable interface.
- Implemented a modular, responsive component architecture, allowing new "applications" to be added to the OS UI without restructuring core logic.

AI Infrastructure Guardian / [AI Hackathon Project](#)

- Built a real-time automated system which worked on the voice and text command.
- Implemented full-stack data pipelines to process and display live monitoring data, connecting backend data sources to a responsive frontend dashboard.

Automated Resume Builder / Resume.io

- Designed a web-based, form-driven resume builder that auto-generates ATS-friendly resumes from structured user input, similar in concept to platforms like Resume.io.
- Implemented dynamic template rendering and live preview using React and component-based layout logic, enabling real-time formatting updates as users edit content.
- Structured reusable, modular UI components for section editing (experience, education, skills), supporting fast customization without code changes.

EDUCATION

BSc (Hons) Computing	<i>Expected 2027</i>
<i>Itahari International College</i>	
+2 Computer Science	<i>2025</i>
<i>Arniko College, Biratnagar GPA: 3.34</i>	
SEE (Secondary Education Examination)	<i>2023</i>
<i>Arniko School, Biratnagar GPA: 3.40</i>
